ABOUT

Backend-focused engineering student building scalable systems using Java, Spring Boot, and PostgreSQL, with experience in real-time applications using WebSockets. Strong foundation in data structures and problem solving.

EDUCATION

Dnyan Prasad Global University, Pimpri Chinchwad (2025 – 2028)

B.Tech, Computer Science & Engineering | GPA: 9.27

Saraswati Institute of Technology, Kharghar (2022 – 2025)

Diploma in Computer Engineering | 92.63%

SKILLS

- **Programming Languages:** Java
- **Backend & Frameworks:** Spring Boot, Hibernate, FastAPI
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, Maven, Postman
- **Core Concepts:** Data Structures, Algorithms, OOP, WebSockets

EXPERIENCE

Software Engineering Volunteer – Salience Foundation

- Contributing to the development and redesign of a web application using modern frontend technologies, improving UI structure, responsiveness, and performance.
- Identified and resolved frontend and API integration issues, improving application stability and ensuring consistent UI behavior across components.

PROJECTS

GeoWatch | *Flutter, React, Spring Boot, PostgreSQL, WebSockets* | [GitHub](#)

- Built a real-time distributed system using Spring Boot and WebSockets to process GPS data and detect risk clusters using DBSCAN.
- Developed a scalable backend pipeline for incident ingestion and real-time broadcasting, enabling live monitoring of crowd safety events.

GitGo | *TypeScript, Node.js, VS Code Extension API, Git* | [GitHub](#)

- Developed a [VS Code extension](#) automating end-to-end GitHub publishing, reducing manual workflow and ensuring consistent repository structure.
- Designed a modular pipeline architecture with atomic execution and rollback handling, ensuring reliable automation across publishing stages.

AASHA | *React (PWA), Spring Boot, Indexed DB, PostgreSQL* | [GitHub](#)

- Built an offline-first healthcare platform using Spring Boot and IndexedDB converting voice/text inputs into structured patient data, with REST APIs and synchronization enabling risk detection in low-connectivity environments.

WardWatch | *Spring Boot, PostgreSQL, REST APIs, React, WebSockets* | [GitHub](#)

- Built a real-time hospital ward management system using Spring Boot and REST APIs to track bed occupancy and patient flow, modeling lifecycle transitions with capacity forecasting and role-based access control.

EXTRACURRICULAR ACTIVITIES

Technical Team Member – Kryptonex Tech & Innovation Club, DPGU

Organized coding competitions and technical events, engaging 100+ students and promoting problem-solving culture.

Co-Founder – [RuntimeSync](#) (GitHub Organization)

Co-founded and managed a GitHub organization, contributing to project development and repository workflows.

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate (2025) | [Credential](#)
- AI Agents – Google x Kaggle (2025) | [Credential](#)
