ABOUT

Backend engineering student experienced with Java, Spring Boot, PostgreSQL, and WebSockets, building real-time and database-driven applications.

EDUCATION

Dnyan Prasad Global University, Pimpri Chinchwad (2025 – 2028)

B.Tech, Computer Science & Engineering | CGPA: 9.09

Saraswati Institute of Technology, Kharghar (2022 – 2025)

Diploma in Computer Engineering | 92.63%

SKILLS

- **Languages:** Java, JavaScript
- **Backend & Frameworks:** Spring Boot, Hibernate, WebSockets, REST APIs
- **Frontend:** HTML, CSS
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, Maven, Postman
- **Core Concepts:** REST APIs, OOP, Data Structures & Algorithms (110+ LeetCode problems), DBMS

EXPERIENCE

Web Developer Intern — Saliency Foundation

Mar 2026 – Present

- Developed and redesigned 10+ responsive web application pages with API integration, improving usability and UI consistency across desktop and mobile devices.
- Diagnosed and resolved frontend and API integration issues across multiple modules, improving application reliability and reducing recurring UI inconsistencies.

PROJECTS

GeoWatch / *Spring Boot, PostgreSQL, WebSockets* / [GitHub](#)

- Built a real-time crowd monitoring platform that processes live GPS incident reports using DBSCAN clustering to detect high-risk zones during large public events.
- Integrated geospatial heatmaps and dashboard updates to help organizers track incident clusters and crowd-risk levels continuously.

GitGo / *TypeScript, VS Code Extension API* / [GitHub](#) [Marketplace](#)

- Engineered a VS Code extension that automates repository structuring, README generation, Git operations, and pull request workflows for coding solution publishing.
- Designed an automated publishing pipeline with staged execution, rollback handling, and persistent configuration management, reducing manual publishing time by 10–15 minutes per submission.

AASHA / *React (PWA), Spring Boot* / [GitHub](#)

- Created an offline-first healthcare application to capture structured health records, apply rule-based risk flagging, and synchronize locally stored data in low-connectivity rural environments.

WardWatch / *Spring Boot, PostgreSQL, WebSockets* / [GitHub](#)

- Built a hospital ward tracking system to monitor bed occupancy, patient movement, and ward availability through centralized status updates.

EXTRACURRICULAR ACTIVITIES

- Technical Team Member at Kryptonex Tech & Innovation Club, organizing tech events for 100+ participants.
- Received the Best Website award at WebCraft Carnival 2026.
- Co-founded [RuntimeSync](#), a GitHub organization for collaborative development and repository management.

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate (2025) [Credential](#)
- Google Agentic AI — Google x Kaggle (2025) [Credential](#)
